**Current Timeline** - Coming to some peoples' attention around 2017, this famous line mysteriously changes to *"Houston, we've had a problem."*, changing the context of the issue from a present-tense problem, to a past-tense problem.

**Note:** A past-tense problem makes no sense whatsoever when considering the specific context during the film when Tom Hanks speaks this line of dialog.

Inexplicably, a few months later the line changes back to the original dialog.

**Original quote**

**Changed to**

**And then changes back to**

**Original Timeline** - No history

**Current Timeline** – ‘Black Tom Island’ was a tiny island situated within New York Harbor. During WWI it was being utilized as a munitions depot, used to store and distribute allied weaponry.

On July 30<sup>th</sup> of 1916, two German spies set-off an explosion on Black Tom Island. This initial explosion led to the ultimate detonation of some 2 million tons of wartime munition supplies.

The amount of energy released during these explosions has been estimated to be roughly equivalent to that of an earthquake measuring 5.5 on the Richter Scale.

Atmospheric shockwaves emanating from these explosions were felt by people as far away as Philadelphia, a distance of nearly 100 miles. Thousands of windows were smashed in lower Manhattan, with reports of windows being broken 25 miles away.

One massive explosion in particular during this event was so incredibly powerful, that it’s been estimated to be the largest non-nuclear explosion in world history.

Thankfully and unbelievably, there were only four confirmed human fatalities suffered during this wartime attack by the Germans.

The estimated property damages resulting from this foreign attack came to \$500 million when solving for inflation.

A sizable hunk of shrapnel erupting from these explosions on Black Tom Island flew across New York Harbor and violently struck the torch on the Statue of Liberty; situated several hundred yards away on Liberty Island.

The torch was damaged so severely, that it’s been completely closed to the general public since this event occurred in July of 1916.

**Residue** – Despite the fact that the torch on the Statue of Liberty has been fully inaccessible to anyone from amongst the general public since 1916, many people have very distinct memories of visiting the Statue of Liberty, and climbing the cramped spiral staircase up-inside the torch.

After reaching the top of the torch, visitors had the best possible bird’s eye view of the entire surrounding area from the observation deck, situated roughly 300 feet above ground level.

Part of this extremely unique experience with the torch that made it especially memorable, was looking down some 40 feet below to see the very top of Miss Liberty's massive pointed crown.

In addition to having these clear memories of going-up inside the torch, some also remember the specific set of instructions they'd been provided by park staff to ensure everyone's enjoyment and safety.

**Picture above shows the very top of the crown on the Statue of Liberty, captured from the torch's observation platform 40 feet above.**

It would have been considered to be blatantly sacrilegious for Michelangelo to paint a Holy portrait on the ceiling of a Holy Chapel which displayed Adam’s hand higher than God’s Hand.

**Current Timeline** – Adam’s hand is now inexplicably higher than God’s Hand. Over the last 24-36 months as of this writing, God’s Hand has gotten incrementally lower.

**‘Creation of Adam’ by Michelangelo  
Sistine Chapel 1512**

Another issue which seems to have altered for many people is God’s attire. Wasn’t God wearing a type of thick white cloth which primarily wrapped around his groin area? When did God get this pink chiffon nightgown?

Strangest of all, God’s left hand now appears to be deformed and claw-like. The index finger is abnormally thick, abnormally long and abnormally double-jointed.

Since at least the 1970's, the topic of King Tut was a regular part of our American culture for 2-3 decades. Popular comedian Steve Martin released a novelty song called 'King Tut' in 1978 which reached #17 on the *'Billboard Chart'*.

**Well the bear will be gentle  
And the wolves will be tame  
And the lion shall lay down by the lamb, oh yes**

Performing during the same era, the popular Country music singer Johnny Cash records this same song, having the same segment of lyrics which specifically mentions the lion lying with the lamb.

Some thoughts for special consideration regarding this particular Mandela Effect;

In the former “...and the *Lion shall lay with the Lamb*”, for some, the ‘Lion’ represented ‘the King’, which in turn represented Jesus. A popular interpretation of the ‘*Lion lying down with the lamb*’ symbolized Jesus protecting his flock; this ‘flock’ being those who hold undying faith in Him.

When considering ‘*The wolf also shall dwell with the lamb...*’ the ‘wolf’ does not symbolize Jesus in any recognizable way.

The term ‘*wolf*’ in place of the term ‘*lion*’ completely changes the former popular context of **Isiah 11:6**.

on Earth, as it is in Heaven.  
Give us this day our daily bread and forgive us our trespasses,  
as we will forgive those who trespass against us.  
Lead us not into temptation, but deliver us from evil.  
For thine is the kingdom, the power, and the glory, forever and ever,  
Amen*

**Current Timeline** – As of January 2023, in the KJV version of the Bible, this same segment of the Lord’s Prayer as mentioned above now reads;

*Give us this day our daily bread.  
And forgive us our debts, as we forgive our debtors.*

The entire Lord’s Prayer now reads;

*Our Father which art in heaven, Hallowed be thy name.
